

DATE: 7/2016

VEHICLE: 2011-2016 Hyundai Electra (J2HY43)

There are two types of rear cushions for this vehicle and Katzkin's rear cushions are designed to work for both types of cushion. There is no way to tell which cushion you have until the cloth comes off.

One is a foam cushion with a wire cage where the leather cover is hog ringed to the frame.

One is an all Styrofoam cushion with plastic T-clips that insert into channels in the Styrofoam.

If you have the Styrofoam cushion, the vinyl flaps are made long enough so you can staple them down to the Styrofoam using ½" staples, or you can anchor the cover down by using plastic Christmas tree type fasteners and punch into the Styrofoam.

These instructions are also printed on the packing slip when you receive the box.
